EDUCATION

B.S. in Computer Science

University of Minnesota, Twin Cities

May 2026

College of Science & Engineering

- GPA: 3.8 / 4.0

SKILLS AND CERTIFICATIONS

Certifications: AWS Certified Cloud Practitioner

Technical Skills: Swift, SwiftUI, C#, Java, JavaScript, React.js, Next.js, Python, SQL, Excel, CAD, Git

WORK EXPERIENCE

Software Engineer Intern, Capgemini, Cincinnati, OH

June, 2025 – July, 2025

- Developed a full-stack agentic AI system using LangChain, building both the frontend in React and the backend in FastAPI. Built and shipped cross-platform mobile apps using React Native and Flutter. Created games in Unity, including a 2D game and a 3D VR experience. Used Git for version control across all projects and worked across diverse tech stacks to deliver functional, polished software.

Full Stack Developer, PRSM, Eden Prairie, MN

June, 2023 – August, 2024

- Led a skilled team in conceptualizing, designing, and developing dynamic websites using JavaScript and Next.js. Engaged directly with clients to understand their needs, ensuring seamless communication and swift adaptation to evolving requirements, resulting in optimal satisfaction and successful project outcomes.

Assistant Teacher, Tech Academy, Little Canada, MN

June, 2021 – August, 2022

- Facilitated the instruction of young learners in coding languages, including Python, by actively assisting the teacher. Stepped into a leadership role when necessary, independently guiding and instructing students during the teacher's absence.

Teacher, Kumon, Bloomington, MN

August, 2019– August, 2023

- Facilitated academic progress for K-12 students by providing tailored assistance in math and reading, while concurrently administering thorough grading and constructive feedback on their homework assignments.

Sales Associate, Gamestop, Eden Prairie, MN

May, 2023 – August, 2023

- Directed and oversaw comprehensive store operations independently, managing responsibilities such as sales, customer service, and inventory control. Regularly strategized and implemented initiatives to optimize sales performance and enhance overall store efficiency.

PROJECTS

BetterFriends - iOS App, SwiftUI, PostgreSQL

- Developed and scaled a social app to over 150 active users across 10+ countries. Built a robust backend using PostgreSQL to manage global user data and interactions, ensuring high availability and performance.

ClassRate - iOS App, SwiftUI, CloudKit

- Architected a student rating platform from development to App Store launch. Leveraged CloudKit for data sync and iterated on features based on reviewer feedback and user metrics.

Setrix - iOS App, SwiftUI

- Developed a workout tracker with Swift Charts for progress visualization. Built a calendar-based logging system and customizable data entry using CloudKit for sync.

Machine Learning Research, University of Minnesota

September, 2024 - November, 2024

- Conducted research on machine learning and Bayesian optimization, focusing on their theoretical foundations and practical applications. Explored various use cases, including molecular structure optimization, to understand how optimization techniques improve complex system performance. Developed a strong analytical foundation in machine learning methodologies, enhancing problem-solving skills in data-driven research.
